

Your Parts, One Click Away

Identify and Produce Parts On-Demand

3YOURMIND is an on-demand manufacturing software that empowers manufacturing supply chains to identify and produce parts on-demand.

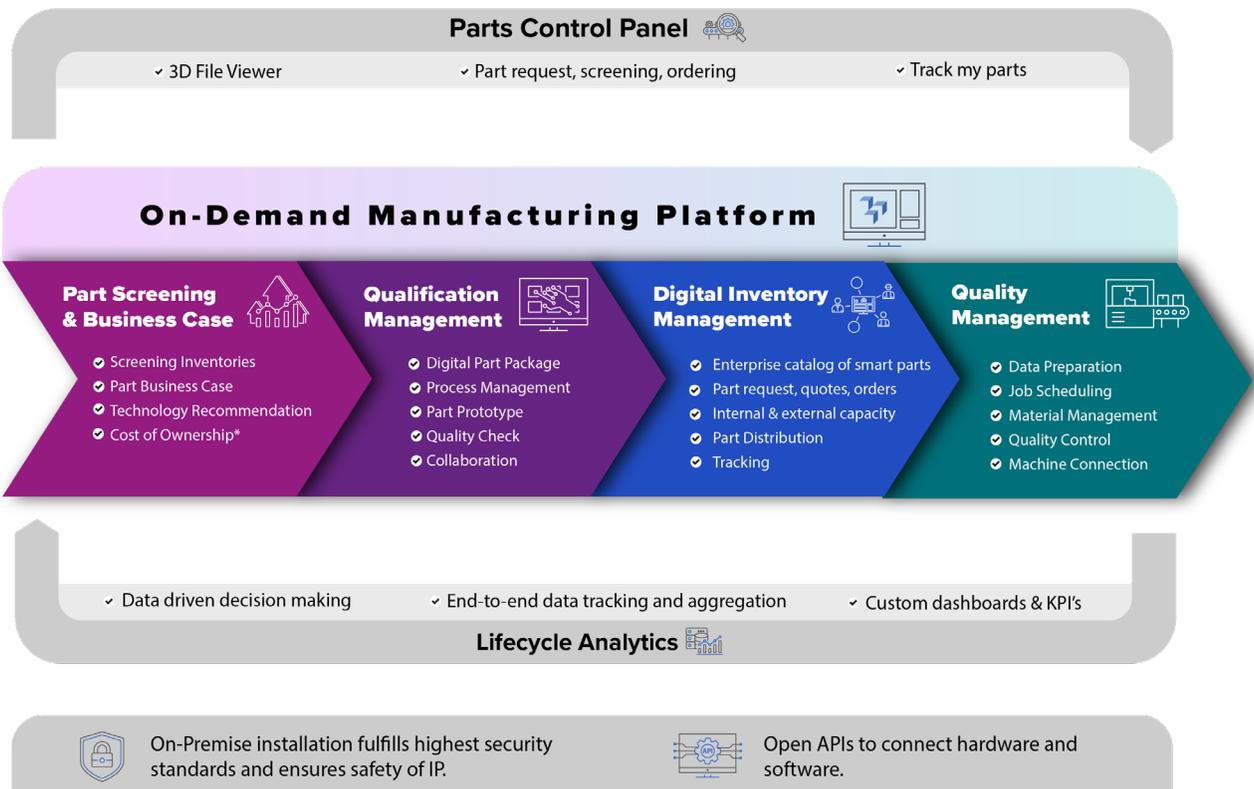

OEMs, operating companies, and contract manufacturers can create digital inventories of qualified parts to reduce costs, shorten production lead times, and secure more efficient and agile operations.

Accelerate Your On-Demand Manufacturing Business

We support customer efforts to improve part quality and make informed, data-driven decisions by managing the entire digital thread – from part identification to production.

Unlike other software solutions, 3YOURMIND encapsulates cutting-edge advanced manufacturing technologies to ensure the best business case for on-demand production throughout the entire product lifecycle.

Software That Adds Value Across Organizations

Simplify your software. Share knowledge more easily, increase transparency between teams, and improve collaboration with one solution that benefits different roles.

Service Operation Teams

- ▶ Get parts up to **90% faster** on-demand.
- ▶ Reduce unplanned **downtime costs** of up to **€2.5M**.
- ▶ Reduce **inventory stock costs** of up to **€5M**.
- ▶ Get parts **40% cheaper** that **saves up to €10M** direct costs.

- ▶ Easy to use platform
- ▶ One centralised tool with connected workflows & data
- ▶ Greater transparency, less frustration, more motivation

Innovation & Product Teams

- ▶ Screen up to **10x more parts** in less time.
- ▶ Get parts qualified **80% faster**.
- ▶ Teams spend **less time e-mailing** and more time collaborating on parts.

- ▶ Spread AM knowledge and gain more advocates
- ▶ Gain more confidence and autonomy
- ▶ Celebrate success

Supply Chain & Procurement Teams

- ▶ Increase **margins by 5-10%** across the entire portfolio.
- ▶ Access parts faster with **60% more efficient processes**.

- ▶ Simplify processes with a strong supplier ecosystem.
- ▶ Improve communication and transparency

Production Teams

- ▶ **Double production capacity** by increasing equipment utilisation by up to 75%.
- ▶ **Reduce manual processes by 50%** resulting in fewer production steps.

- ▶ Track parts in production more easily
- ▶ Access better data tracking
- ▶ Improve collaboration with customers
